Experience

Sesimi	Melbourne, Australia
Technical Lead April 2025 – Present - Actively engaged in pair programming sessions within a multicultural team spanning Indian, Australian, Vietnamese, and Filipino colleagues, helping unblock technical challenges and guide best practices, earning the top recognition company-wide through a peer-based reward system reflecting consistent contributions to team success. - Collaborated with senior team members to identify and automate repetitive Design Engineer workflows, maintaining thorough documentation of processes, tools, and best practices for the Content Team. - Conducted workshops covering automation, efficient workflows, and onboarding, producing video tutorials and written documentation to accelerate team learning and reduce ramp-up time for new hires. - Led regular code reviews and one-on-one mentoring sessions to continuously develop the team's technical skills and raise the overall quality bar. - Managed the full onboarding experience for new team members, providing structured training, tooling setup, and ongoing support to ensure smooth integration into the team. - Participated in candidate interviews, evaluating technical skills and cultural fit for open engineering roles.	
Full-Stack Web Developer	February 2023 – March 2025
- Spearheaded the translation of PDF brand guidelines into production-ready component libraries for over 20 clients, including high-profile brands like Toyota, Volkswagen and Bondi Sands, standardizing theme colors, typography, spacing, and logo usage so development teams could build consistently without referencing raw brand documents. - Built and maintained dozens of client-facing email, video, and ad templates using React, Remotion, and GSAP, enabling clients to independently customize and deploy branded content at scale. - Set the standard for pixel-perfect, fully responsive UI implementation across the team, ensuring every component matched design specifications precisely and maintained visual consistency across all screen sizes. - Established coding standards from scratch across all React and Next.js projects by introducing ESLint and Prettier, and personally trained the team on best practices, bringing consistency and code quality to a codebase that previously had no enforced guidelines. - Refactored complex components across the codebase by decoupling business logic from UI layer, improving performance, maintainability, and readability for a team of 15 developers. - Overhauled slow database queries and REST API endpoints, redesigning inefficient logic and query structures to deliver a noticeably faster and more reliable backend experience for end users. - Introduced AI-powered tools across engineering and Customer Success teams, conducting hands-on training sessions and automating repetitive tasks including reporting and customer response workflows, significantly reducing task completion time across departments.	
The QuestHub (Part-Time)	Perth, Australia
Web3 Front-End Web Developer & UI/UX Designer	Jun 2021 – Jun 2024
- Spearheaded the front-end development of a Solana-based DeFi lending platform as part of a cross-functional team, delivering a fully functional product that successfully facilitated over \$10 million in user loans. - Built a fully functioning Bitcoin web wallet accessible via URL, designed to work like a digital red envelope for sending and receiving BTC, onboarding over 10,000 users across multiple markets. - Wore dual hats as both Front-End Developer and UI/UX Designer, independently designing screens in Figma and presenting proposals to the full team before leading implementation, ensuring design intent was preserved end to end. - Developed and maintained responsive, performant UI components across multiple Web3 projects using SvelteKit and React with Tailwind CSS, ensuring seamless user experiences across desktop and mobile. - Translated complex blockchain interactions into clean, intuitive Figma designs and working interfaces, making Web3 products accessible to non-technical users. - Optimized and authored MySQL queries to support backend data needs, contributing to a more reliable and efficient data layer across the platform.	
Cloud Panda	Pasig, Philippines
Front-End Web Developer & UI/UX Designer	January 2020 – February 2023
- Independently designed and developed 20+ client websites end to end, translating Figma designs into production-ready code using React, SCSS, and Bootstrap, covering brands including toktok, CopperMask, and Siomai King. - Contributed to the TokTok brand ecosystem serving over 1 million users in the Philippines, designing and developing UI screens across toktokwallet, toktokmall, and toktokdelivery, and designing mobile app screens in Figma presented to the full team. - Designed and developed the Miss Universe Philippines 2021 live broadcast platform, enabling viewers to purchase tickets to exclusive digital experiences, driving over 100,000 tickets sold. - Implemented comprehensive SEO best practices across all marketing websites, covering meta tags and structured data, page speed and Core Web Vitals, and semantic HTML structure, ensuring maximum search visibility for every client. - Maintained a pixel-perfect, fully responsive standard across all 20+ projects, building from Figma designs and ensuring visual consistency across desktop and mobile for every client deliverable. - Handled end to end visual production by creating and refining graphics, icons, and digital assets using Photoshop and Illustrator, ensuring brand consistency across both web interfaces and marketing materials.
